

Take control of your email Mailtraq 2.12

Mailtraq - since 1997

When you are moving your organization's email services in-house and away from your ISP and you are worried about the cost and security implications of using hosted services, Mailtraq is an affordable alternative to Microsoft Exchange Server. Mailtraq provides the power and flexibility you need with a much lower TCO. Mailtraq lets you escape from Exchange without having to move away from the familiar Windows operating system - and without the risks of going 'open-source'.

Organizations of all sizes need a reliable and flexible email system, and Mailtraq provides an ideal solution: Mailtraq has been reliably providing the primary email server software to businesses, banks, government departments and organizations just like yours - in the USA, Europe and around the world since 1997.

Most people will consider using Microsoft Exchange Server for their email server, however its high license costs, hardware and operating system requirements, and high administration costs mean it is neither affordable nor suitable for most users: Mailtraq Professional edition is your alternative.

WHAT IS MAILTRAQ 2.12 ?

Mailtraq 2.12 is the next version of Mailtraq, the long-established alternative to Microsoft® Exchange Server for email, calendaring and co-operation. It installs on both server and desk-top versions of Windows and comes bundled with a series of added-value corporate tools.

Mailtraq 2.12 has been designed specifically to provide today's organizations with the services and tools they need - without the high costs of licensing, administration and support found elsewhere.

Corporate Advantage

Mailtraq will meet the email and collaboration needs of your organization: large or small. Low license cost, no server CALs, and easy administration give you a low Total Cost of Ownership, whilst still giving you the secure email, group ware and mobile access you need.

Extra features

Mailtraq comes with a host of extras designed to make the best use of email messaging within your organization. Full-scale mailing list engine, user-defined Phrase Library, anti-spam system and anti-virus integration - all at no extra cost.

Tech Notes

Mailtraq Professional is a Multi-threaded SMTP, POP3, IMAP and full Web Server. It comes with LDAP and Directory services plus Outlook synchronization, RSS out-feeds, anti-spam engine, DomainKeys & SPF support, anti-virus integration, integrated back-up and disk monitoring. A Cluster Gateway is provided free of charge for load balancing, multiple locations and IP Sharing.

Support

Mailtraq is a well established, reliable email server, but a good support service is vital to your organization. Mailtraq has dedicated email professionals here to help you. Fast, friendly support for pre-sales, installation and current users is a core part of your Mailtraq experience.

Mailtraq Professional's ease of use and powerful feature set, coupled with its low license cost and ease of administration mean that your organization can move up to the level of email control and accessibility you need at a fraction of the cost you expected.

Mailtraq 2.12 - the Exchange Server Alternative

Consider the advantages of using Mailtraq - straight off the shelf - as an alternative to Microsoft Exchange.

- Low license cost**
- Easy administration**
- Groupware and Corporate Advantage features**
- Technical compliance**
- Support**

Low license cost - *Bottom line: a much lower TCO*

Mailtraq is considerably less expensive than Microsoft Exchange.
 The initial purchase and licensing cost is less, and the ongoing administrative cost is *much* less.
 Support is included with your purchase: there are no additional contracts or per-incident charges.
 No server CALs required

Easy to Administer

There is no need for specialist training courses to learn to use Mailtraq.
 Installation is straightforward, and a wizard sets up your initial configuration, to give you a secure installation
 Ongoing administration is straightforward, with easy to use, intuitive interfaces.

All the Functions you want

Full function archiving to fulfill legal e-discovery requirements - with complete date-range search and recovery.
